# Streamline Field Service Management with Praxedo & Sage X3

The ideal combination to take your operations to the next level

Use the Praxedo connector for Sage X3 to:

- Synchronize Sage X3 customer data
- Automate work orders through X3 service requests
- Optimize technicians' schedules and send instructions
- Track work orders end to end
- Capture job details and send to X3 (hours, inventory items)
- Generate comprehensive work order reports in X3

### Get all the benefits of real time data without double entry:

- Manage maintenance or service contracts
- Retrieve information on costs and billable hours to track revenue
- Pull up work orders by account number
- Monitor inventory items in real time
- Initiate invoices

*only compatible with Sage X3, versions 11 and 12.

Praxedo maximizes the Sage X3 service functionality through its:
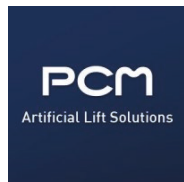

Web application for the office

- manage work orders and skill sets
- optimize scheduling and routes
- track technicians' activities in real time

Mobile application for the field

- send schedule updates and instructions instantly
- capture field data via electronic forms
- view job history on any device

Our customers say it best
