

Your AI-Powered Inventory Expert

Netstock's next-generation AI functionality is now fully integrated into the Netstock Predictor Inventory Advisor solution

With just one click this cutting-edge AI turns complex data into clear, actionable steps to solve specific problems and improve results—saving you time to focus on what matters most.

An inventory expert at your fingertips

The AI functionality instantly helps you analyze a specific situation and delivers smart recommendations tailored to your business needs—making impactful decisions easier than ever.

KEY FEATURES

Dashboard Analyzer: Transforms complex charts into an easy-to-read summary with actionable recommendations for quick, impactful decisions.

Item Analyzer: Delivers clear insights into item performance, offering solutions for stock-outs and strategies to optimize inventory.

Item Troubleshooter: Empowers your team to resolve item-specific issues without needing outside support – offering fast, effective solutions to boost profitability.

Report Explainer: Clarifies reports with simple, easy-to-read summaries, making it easy for new users and management to act quickly and accurately.

Your data remains secure

Netstock's AI functionality is built responsibly to ensure your data remains secure while providing the insight and agility needed to optimize your supply chain.
